

DATA SHEET ConferenceManager™ 2

Smart, Simple, Secure. Sonexis ConferenceManager2 is a world class Audio, Web and Video conferencing platform that eliminates the costly per minute fees of subscription-based services, while setting new standards for security, simplicity and feature rich functionality.

Designed to integrate seamlessly into any voice and data network, ConferenceManager2 has been deployed by hundreds of leading organizations across a broad range of industries worldwide. Sonexis has been setting the standard for Audio, Web and Video conferencing excellence for nearly two decades.

DISCOVER THE BENEFITS:

SMART

The financial picture is clear; Sonexis ConferenceManager2 provides a rapid, compelling return on investment. ConferenceManager2 usually pays for itself in less than 12 months. The more conferencing you do on ConferenceManager2, the more money you save. Budget busting Service providers just can't compete. ConferenceManager2 allows your organization to communicate freely, efficiently and effectively while driving costs down.

With our unique architecture you're never more than a license key away from new features, increased capacity or switching between H323, SIP or T1/PRI connectivity.

SIMPLE

The ability to adapt ConferenceManager2 to the always changing needs of your organization through a simple software upgrade is just the beginning of ConferenceManager2's unmatched ease of use. Whether you're an end-user or the system administrator, you'll be amazed how easy conferencing can be.

Just plug ConferenceManager2 into your network and within minutes your organization will be scheduling, launching and recording conferences; collaborating in real-time; even inviting new attendees on the fly.

ConferenceManager2 makes it easy with familiar applications like Microsoft Outlook, Lotus Notes and your web browser of choice. Integrating with these well-known interfaces makes ConferenceManager2 intuitive and easy to use for your entire organization.

SECURE

ConferenceManager2 integrates into your security infrastructure so you aren't relying on a 3rd party to keep your information safe. There are a wide range of features designed to allow every organization to tailor the security of ConferenceManager2 to their own specific requirements. Sonexis solutions are deployed in nuclear power plants, international airports, military bases and many other highly secure environments where security is paramount.

In addition to keeping your business critical information safe, ConferenceManager2 also keeps it available 24/7/365. When a disaster strikes, ConferenceManager2 is the platform organizations turn to for crisis management. Our exclusive ConferenceContinuity™ high availability option insures your organization is communicating effectively when it's most important.

ConferenceManager2's powerful features give you fast, full-function audio conferencing that is cost-effective, easy to use and secure.

1 Host can easily identify participants by name
Visual indicator shows Web conference participation
Administrators can easily manage users through Microsoft Active Directory

2 ActiveTalker™ highlights who's speaking—or who's got the noisy line

3 Participants can signal:
When they're ready to return to the main conference; or
When they have a question in listen-only "lecture" mode

4 Host can divide participants into (up to) ten private sub-conferences

5 Host can easily label sub-conference rooms and navigate between them
